

STEELMASTER MULTI TWIN CYLINDER SERIES

Press Brake Attachment, Electric Length Stop And Quick Change Tool Holder.

STEELMASTER Hydraulic Twin Cylinder Punch & Shears range from 70 ton through to 125 ton capacities. Our machines are well designed and engineered to meet your exacting requirements and manufactured to ensure a long working life.

These universal machines are supplied with standard tooling including repetition support tables at punch, shear and notch stations and with easily adjusted hold downs at all five work stations to safely control the operations. Comprehensive safety guards are fitted as standard on all work stations.

Free standing on a suitable floor, they only require an electrical connection to be ready for production. For two operator operation, the hydraulic system is activated by two shielded foot controls, one operating the punch end cylinder, the other operating the shear end cylinder. The shear cylinder provides the power to the three shearing and the notch stations.

The system gives accurate power inching at all five work stations and allows the machine to be stopped at any position giving safe and accurate tool setting and work positioning. Limit switches at both ends of the machine control stroke length at all stations.

EQUIPMENT & ACCESSORIES SUPPLIED

10 sets standard punch & dies, LED worklight, Electric Touch and Cut, Laser Punch Guide, Heavy Duty Flat-Bar Bending Attachment, Toolkit & manual.

INCLUDES 10 SETS OF PUNCH & DIES

UNIQUE FEATURES

"making ours unique!"

- LED worklight
- Electric touch & cut
- Press Brake Bending Attachment
- Laser Punch Guide

3 ph /415 volt machinery do not come fitted with plugs as standard. GST is NOT included in the listed prices
